

FleXband

Anti-burst Gymball

FleXband Anti-burst Gymball is developed for professional use. Available in 3 sizes and has been tested for its anti burst properties at static weight up to 120kg. Widely used in exercise and rehabilitation for various conditions.

BENEFITS!

- To develop balance and coordination.
- For stretching and flexibility exercise.
- Provides a total body workout with each exercise.
- An excellent way to train your abdominal.

Anti-burst puncture test :

The gym ball is compressed with a static weight of 120kg

It is punctured with a sharp object

The compressed ball deflates and does not burst

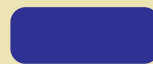

Available in 3 colors and sizes :

Pink | 55cm

Green | 65cm

Blue | 75cm
